

E PLURIBUS UNUM

From many sources, one single view of a person's skills.

**GEORGIA**  
VIRTUAL LEARNING

# Georgia Virtual competency based learning pathways

Georgia state's Virtual School is working to transform traditional education into competency based learning.

The professional development of teaching staff was chosen for the pilot project, specifically as part of their new certification of "Learning Engineer".

CaSS was implemented, and is now linked to Georgia Virtual's identity management and internal systems.

This solution comprises two major elements;

- Competency framework management of learning pathways.
- Personal profiles that gather data and assertions about each teacher.

# Georgia Virtual competency based learning pathways

“Gather data”... easy to say, but a task of astonishing complexity.

We built a way to ingest data about professional development and qualifications from any and every source. Using our agnostic functionality we pull in all the evidence, and build one picture of every teacher’s capabilities.

**It’s like ‘Google Translate’ for professional development.**

This is the key to managing individuals through a learning pathway with accuracy and efficiency.

For administrators, these journeys are now fully visible.

And IT departments are confident in a system that’s fully integrated, internally and externally.

Whatever the data source, it’s all the same to us... CaSS’ agnostic functionality ingests all the pieces of the jigsaw, and assembles them into a coherent picture of each individual’s capabilities.

# Another solution built on CaSS from Eduworks

Eduworks is a world leader in the field of competency and skills solutions.

CaSS was developed by Eduworks and is an open-source software platform, used by the US Department of Defense, public sector agencies and private sector businesses. CaSS is not a 'product' - it is the foundation upon which we deliver tailored solutions for clients embracing the move to competency-based talent management.

We work with clients globally from our head office in Oregon USA, and our bases in Washington, Florida, New York, Canada, Korea, Austria and UK.

Eduworks is partnered with and represented by the Human Advantage Consultancy in London, England.
